**HotAir Signs Five Individual Contracts for
High-Speed Wireless Internet Access**
Holiday Inn, Quality Inn and Comfort Inn properties
join HotAir's growing customer list.

MELBOURNE BEACH, FL - November 30, 2004 -- HotAir Network Group is pleased to announce that five new customers have signed contracts for HotAir high-speed Internet access (HSIA) services. These contracts represent independent companies or management groups that may ultimately offer additional properties based on HotAir's performance.

Holiday Inn Express - Orlando, Quality Inn - Dundee, Comfort Inn - Elkton, Holiday Inn Express - St. Augustine, and Holiday Inn Maingate West - Kissimmee have chosen HotAir as their high-speed wireless Internet provider. HotAir will supply total property high-speed wireless coverage in all guest rooms, common areas and conference rooms. This will provide every guest and conference attendee access to the Internet in order to check email, browse the Internet or connect to their corporate VPN.

"We are pleased with the opportunities created by this volume of new business," stated Steve Gould, President of HotAir Network Group. "Our track record shows that once we have a relationship with a customer, we are most often asked to expand to their entire portfolio of properties."

The HotAir solution offers the ability to address any brand standard with a fully compliant installation and operational support. HotAir has certified five different Hampton properties through the entire process.

"Our solution is ideal for the hospitality industry, and we couple that with well trained and fully qualified technical support. This combination allows us to address every aspect of a customer's concerns, whether it's brand standards or handling guests in a professional manner. Once a management team sees our performance, they begin to bring us all of their properties," said HotAir Network Group CTO Sam Triever.

The HotAir solution begins with the installation of a customized high-speed wireless network specifically configured to ensure the elimination of dead zones and provide secure, quality connections in every guest room. HotAir's solution includes a comprehensive set of marketing and sales support materials, 24x7 technical support and a wide range of equipment to support every guest's needs.

Properties currently using the HotAir service include Holiday Inn, Sheraton, Radisson, Hampton Inn, Jameson Inn, Signature Inn, Best Western and Hawthorn Suites.

About HotAir

HotAir has quickly gained recognition for providing a comprehensive business solution for high-speed Internet access (HSIA) to the hospitality industry. They optimize the solution by providing a turnkey, low-maintenance network that has a minimal impact on hotel staff while providing associated support on a 24/7 basis. HotAir offers a complete HSIA package tailored to each customer's operational requirements, brand standards and other unique considerations, specializing in integrated solutions allowing remote management and support for customers. HotAir is rapidly advancing the future of high-speed wireless technologies through innovative solutions based on firm industry knowledge and dedicated installations.
