HotAir Brings Six Holiday Inn Properties Online in Four Weeks

Properties in Orlando, Kissimmee, Palm Coast, St. Augustine, Cocoa, and Cocoa Beach now offer the HotAir solution.

MELBOURNE BEACH, FL - December 2004 -- HotAir Network Group continues to build a strong relationship with InterContinental Hotels Group and Holiday Inn management groups by bringing six new Holiday Inn properties online within the past four weeks. With each success lies the opportunity to further expand the HotAir high-speed Internet access (HSIA) solution to more Holiday Inn sites.

"Our success is due to the fact that we offer a solution that works - it works the first time, it works every time, and we are responsive to all of our customers' needs," stated Steve Gould, President of HotAir Network Group. "Recently, a Holiday Inn site called us in a panic. They had two weeks before a large corporate group was due to arrive. The corporate group demanded HSIA. We were able to respond to the customer's needs, the corporate group loved our service, and the customer is very happy."

Holiday Inn Maingate West Kissimmee was the first to go online with HotAir as their high-speed wireless Internet provider. Installations at Holiday Inn Expresses in Orlando, Palm Coast, St. Augustine, Cocoa, and Cocoa Beach followed, representing service to a total of approximately 800 guest rooms. HotAir supplies total property high-speed wireless coverage in all guest rooms, common areas and conference rooms. This provides every guest and conference attendee access to the Internet in order to check email, browse the Internet or connect to their corporate VPN.

The HotAir solution at all Holiday Inn properties began with the installation of a customized high-speed wireless network specifically configured to ensure the elimination of dead zones and provide secure, quality connections in every guest room. HotAir's solution includes a comprehensive set of marketing and sales support materials, 24x7 technical support and a wide range of equipment to support every guest's needs.

Properties currently using the HotAir service include Holiday Inn, Sheraton, Radisson, Hampton Inn, Jameson Inn, Signature Inn, Best Western and Hawthorn Suites.

About HotAir

HotAir has quickly gained recognition for providing a comprehensive business solution for high-speed Internet access (HSIA) to the hospitality industry. They optimize the solution by providing a turnkey, low-maintenance network that has a minimal impact on hotel staff while providing associated support on a 24/7 basis. HotAir offers a complete HSIA package tailored to each customer's operational requirements, brand standards and other unique considerations, specializing in integrated solutions allowing remote management and support for customers. HotAir is rapidly advancing the future of high-speed wireless technologies through innovative solutions based on firm industry knowledge and dedicated installations. More information regarding HotAir's products and services can be found at www.hotairnetwork.com or by calling 877-464-4742.
