### **Holiday Inn Express Delivers Internet Services to Travelers on Interstate 95**

Hotel among growing number of Holiday Inn properties to select HotAir as guest Internet services provider.

COCOA , FL - February 2005 -- HotAir Network Group is pleased to announce that Holiday Inn Express I95 in Cocoa , Florida now features a comprehensive HotAir Internet solution. Holiday Inn Express, located directly off Interstate 95, is the latest addition to the growing list of Holiday Inn properties to select HotAir Network Group as their provider for guest Internet services. The Holiday Inn Express offers both wired and wireless solutions for their guests in both the guest rooms and meeting rooms.

"Holiday Inn Express I95 is our second site within the same ownership group. We've found that once we are exposed to an ownership group through an installation, we often get selected for the remaining properties as they become available," commented Steve Gould, President of HotAir Network Group. "Our customer service, the way we focus on each individual property, and the support we provide for the front desk sets us apart from the competition."

"HotAir was referred to us through our ownership group. Normally these types of referrals are suspect and often based solely on lowest price, but this decision was right on target. The HotAir team has solved all our technical support problems and we are thrilled at the positive feedback we get on a daily basis," said Sean Koch, General Manager of Holiday Inn Express I95.

#### **About HotAir**

HotAir has quickly gained recognition for providing a comprehensive business solution for high-speed Internet access (HSIA) for the hospitality industry. HotAir optimizes the solution by providing a turnkey, low maintenance network that has a minimal impact on hotel staff while providing associated support on a 24/7 basis. HotAir offers a complete HSIA package tailored to each customer's operational requirements, brand standards and other unique considerations. HotAir is rapidly advancing the future of high-speed wireless technologies through innovative solutions based on firm industry knowledge and dedicated installations. HotAir specializes in integrated solutions allowing remote management and support for its customers. More information regarding HotAir's products and services can be found at [www.hotairnetwork.com](http://www.hotairnetwork.com) or by calling 877-464-4742.
