**HotAir Delivers Guest Internet Services
to Best Western Key Ambassador Resort in Key West**
Southernmost property in North America is now a fully wireless facility.

KEY WEST, FL -July 2005 -- HotAir Network Group is pleased to announce that the Best Western Key Ambassador Resort in Key West is now a fully wireless facility. The Best Western resort is the southernmost HotAir Internet customer in North America.

Best Western Key Ambassador Resort has six different buildings with over 250 guest rooms. HotAir supplies total property high-speed wireless coverage in all guest rooms and common areas. This provides guests with access to the Internet in order to conveniently check email and browse the Internet at their leisure.

"The Ambassador Resort is a beautiful tropical resort that offers a relaxing environment to their guests. The resort covers over five acres, rich with foliage. HotAir employed several technologies to address the facility's unusual six-building layout, ensuring we could provide our award-winning service to each and every room," commented Steve Gould, President of HotAir Network Group.

"As a vacation resort, the demand for high-speed Internet access is surprisingly high. HotAir was referred to us from Bell South as a 'preferred vendor' based on our brand standards and our need for technical support," explained Nancy Carmichael, Director of Operations for Best Western Key Ambassador Resort. "HotAir has done an outstanding job working with the property staff. HotAir had our site installed and operational within two weeks of signing the contract. We have only had compliments on their service."

In addition to Best Western, brands currently using the HotAir service include Holiday Inn, Sheraton, Radisson, Hampton Inn, Jameson Inn, Signature Inn, Ramada Inn and Hawthorn Suites.

About HotAir

HotAir has quickly gained recognition for providing a comprehensive business solution for high-speed Internet access (HSIA) for the hospitality industry. HotAir optimizes the solution by providing a turnkey, low maintenance network that has a minimal impact on hotel staff while providing associated support on a 24/7 basis. HotAir offers a complete HSIA package tailored to each customer's operational requirements, brand standards and other unique considerations. HotAir is rapidly advancing the future of high-speed wireless technologies through innovative solutions based on firm industry knowledge and dedicated installations. HotAir specializes in integrated solutions allowing remote management and support for its customers. More information regarding HotAir's products and services can be found at www.hotairnetwork.com or by calling 877-464-4742.
